EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a method for forwarding network packets, including the unique functions of:

"determining if the table returned a decap or encap flag; adding a decap byte count to a packet start offset and subtracting an encap byte count from the packet start offset if the decap and encap flags are set."

The closet prior art, Chaudhri et al. (WO 98/20647, Chaudhri hereinafter), discloses a method for forwarding packets in a multicast environment in which a linked list entry containing a first field to indicate the amount of encapsulation that must be removed from the incoming packet to extract a message and a second field to indicate the amount and content of encapsulation that must be added to the message. However, Chaudhri fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
